Stakeholder Register

AspireX — Career Readiness & Skills Gap Analysis Platform

1. Document purpose

Identify proposed stakeholders, their interests, influence, and engagement needs for the AspireX Business Analysis case study, including the Power BI reporting component.

2. Stakeholder register

Stakeholder / role	Key need	Interest	Power
University students	Find role-specific skill gaps and learning priorities	High	Low
Fresh graduates	Assess career readiness and plan next steps	High	Low
Career advisors	Review clear, explainable readiness results	High	Low
University career guidance unit	Understand aggregate career preparation trends	Low	High*
System administrator	Maintain access, data quality and reporting permissions	High	High*
Project owner / BA	Define scope, requirements and quality criteria	High	High
Career guidance analyst	View anonymized skill-gap and readiness KPIs	High	Low

3. Engagement approach

Stakeholder / role	Classification	Proposed engagement
University students	Keep informed	Share prototype updates and gather requirements feedback.
Fresh graduates	Keep informed	Share prototype updates and gather requirements feedback.
Career advisors	Keep informed	Share prototype updates and gather requirements feedback.
University career guidance unit	Keep satisfied	Review proposed reporting goals and confirm assumptions.
System administrator	Manage closely	Review scope, business rules, access controls and deliverables.
Project owner / BA	Manage closely	Review scope, business rules, access controls and deliverables.
Career guidance analyst	Keep informed	Share prototype updates and gather requirements feedback.

4. Power BI reporting stakeholder

The Career Guidance Analyst is a proposed reporting user, not a confirmed employee. Their assumed needs include career-path distributions, common missing skills, and readiness indicators. Any aggregate reporting should use sample or de-identified data.

5. Assumptions and validation

All roles, influence ratings, and engagement strategies are illustrative. No stakeholder interviews have been completed. A real project would validate stakeholder authority, interests, and access to student information. Institutional and administrator power levels depend on future governance arrangements.
